Map covering the northeastern United States, showing key cities and states.
urban?
Columbia’s entry into a city-wide competition for funding to build a new applied sciences campus will include plans to turn three buildings in Manhattanville into centers for data science—first, in the space north of the Mind, Brain, and Behavior Institute and in the Nash building, east of Broadway between 132nd and 133rd streets, and then in a building between 131st and 132nd streets. Those buildings would bring SEAS faculty together with professors from many other schools, including the Journalism School and the Mailman School of Public Health.
